Architecture & Construction YOUTH APPRENTICESHIP

WHERE CAN I WORK?

The architecture and construction career cluster comprises one of the largest industries in the United States. Earnings in this career cluster are higher than average and it offers more opportunities than most other industries for individuals who want to own or run their own business.

This career cluster prepares students for careers in designing, planning, managing, building and maintaining the building environment. People employed in this cluster work on new structures, restorations, additions, alterations and repairs.

Students in architecture and construction learn and practice skills that prepare them for diverse post-secondary opportunities. These opportunities could include two or four-year college programs, apprenticeships or employment. The Youth Apprenticeship Program in collaboration with Career and Technical Education courses will introduce you to a variety of interesting careers.

Career Opportunities:

- Architectural and Civil Drafter
- Environmental Designer
- Electrician
- Residential or Commercial Carpenter
- Engineer
- Construction Worker
- Electrical Design Engineer
- HVAC/HVACR Technician
- Sheet Metal Technician
- Mason
- Plumber

Put your education to work while engaging in great projects and connecting with like-minded professionals. Worksites vary from being immersed in large architectural firms to local working within local construction companies or the opportunity to be trained by trade specialists.

WHAT WILL I LEARN?

This program will allow you to "try out" the career you are interested in and gain a broad understanding of the architecture and construction career fields. You will not only obtain hands-on experience but will be better prepared for college and future career transitions.

WHAT CAN YOUTH APPRENTICESHIP DO FOR ME?

- Build your resume for college applications, scholarship applications and career portfolios
- Earn industry certifications
- Potentially earn advanced standing or transcribed credits for technical college or university programs
- Earn wages and high school credit while learning from professionals
- Earn a state-recognized certificate of occupational proficiency upon completion
